**APIs & Data:** REST, GraphQL, XML, JSON

**Other:** Maizzle, ElasticSearch, Kibana

## Experience

### Frontend Developer

Publicis Groupe • Prague, Czechia

Dec 2023 – Present

- Built and maintained 8 websites for various clients using a combination of Contentful CMS and React Frameworks.
- Ensured high code quality through code reviews and automated SonarQube analysis to detect code smells, maintaining over 80% test coverage.
- Developed responsive, user-friendly web applications for Pfizer, ensuring compliance with strict industry regulations and accessibility standards.
- Developed internal tools to reduce repetitive tasks by contributing to automation and improving boilerplates
- Led code reviews to maintain quality and helped onboard new team members.
- Managed version control and team collaboration via Git, GitLab, GitHub, and Jira, and authored documentation in Confluence.
- Worked in Agile environments (Scrum, Kanban), participating in daily stand-ups, planning, and retrospectives.

### Frontend Developer

Česká Spořitelna • Prague, Czechia

Dec 2022 – Dec 2023

- Worked for a leading bank, designing and implementing high-quality web applications, both internal, integrated into the banking system, and for clients (George application).
- Was part of the team managing operations for cards and ATMs, transactions, and refunds, ensuring smooth transaction processing.
- Guided and supported junior developers, ensuring high coding standards and best practices.
- Ran extensive testing and created test scenarios to confirm software reliability and performance.
- Collaborated with analysts and back-end developers to design applications and implement RESTful APIs.
- Developed and maintained 5 production-grade applications, digitizing key banking processes for internal and client use, improving efficiency and user experience.
- Monitored issues, fixed bugs, and ensured smooth product functionality.
